Minor assembly required

140 LB weight capacity

Never use on trailers

Deluxe Quick Install Locking Hitch Rack

An easy to use, rugged rack to safely transport your bicycles

The Allen QR hitch rack is the perfect way to transport your bicycles on road trips or camping excursions. The quick install locking hitch insert allows you to install the rack into your receiver hitch wobble-free without needing any tools to secure. The individual tie-down cradles secure and protect your bicycles. The rack incorporates folding carry arms that conveniently drop out of the way when not in use. The rack tilts back for easy lift-gate access.

Deluxe QR Hitch Rack Features

Quick install locking hitch insert

The locking knob on the QR models allows the rack to be tightened into the receiver hitch with a wobble-free installation, and the rack can be locked in place for added security.

Folding carry arms (542QR shown)

The carry arms on your rack can be easily folded down out of the way when not in use. This allows for greater flexibility in using your vehicle with the rack installed.

Individual tie-down system

Allen's individual tie-down system secures and protects your bicycles. The tie-downs are fixed in position on the carry arm, but rotate so that they can engage a wide range of bicycle frame sizes and styles.

Tilt-away main mast

The main mast on the rack can be quickly tilted back for easy lift gate access when the rack is in place on your vehicle.

About Allen Sports

Dick Allen (pictured left in 1972) started Allen Sports in his garage in 1967. Since its founding, the company has been committed to producing the highest-quality, easiest-to-use bike racks and bicycle related products on the market. Dick, a onetime aerospace engineer, opened Allen Sports after building a prototype bike carrier in his Lincoln, Massachusetts shop in his free time. The first ever trunk-mounted bicycle carrier made of electrical conduit, metal strapping, and fire hose casings (for padding) was refined on weekend excursions to Cape Cod. Shortly afterward, Allen took his design to market, and by 1971 had established a national presence for his product.

Today, the family owned company operates four warehouses nationally, six factories abroad, and sells products in countries around the world including USA, Mexico, Canada, and China. Review
