For better work and better life, Cyxus focuses on blue light blocking glasses and brings you enjoyment of digital life.

Cyxus Blue Light Filtering Glasses: Focus on Digital Life

Blue ray blocking -- Glasses lens are designed using the American HEV-Absorb substrate absorption technology. It can absorb high-energy blue light. Clear lens -- The lens was made of a fully transparent base, without adding any pigment, while maintaining high light transmittance. Less reflective, no affect reading, and almost no color difference. UV protection -- Anti-Blue-ray Lenses utilize special U.S. substrate processing technology to protect the eyes from ultraviolet radiation and block UV400.

What you get from Cyxus?

Anti eye fatigue

Long time exposure to blue light would lead to digital eye fatigue. Wearing your cyxus glasses, no more tired eyes. Reduce eye strain and sensitivity to light when facing digital screens. Great for office workers or anyone who has to look at screen all day.

Minimize headache

Do you suffer headaches from long time screen time? Cyxus blue light blocking glasses will supercharge your health by blocking detrimental blue light while letting in all other beneficial light.

Sleep better

Exposure to high rate blue light will impact our sense of circadian rhythms and wreck our internal clock, then cause insomnia. Wearing Cyxus blue light filter glasses will improve your sleep, help you sleep better and have good night.

Blue light blocking capacity test

Use the blue light torch to beam the blue light testing card and Cyxus glasses as shown in the first picture. We can see that one part of the testing area directly beamed by blue light has turned blue, and the other part shaded by Cyxus Glasses has not turn blue. Thus we can see, Cyxus blue light filter glasses can block most of the harmful blue light and protect your eyes. With Cyxus glasses, you feel free when facing digital screens.
