[Read Customer Reviews](#)

Made in USA

100% recycled plastic

No BPA phthalates PVC

Dishwasher Safe

No external paints or coatings Green Toys Fire Plane

Fun, Safe, and Way Good for the Earth!

Time for a water drop! The Green Toys Fire Plane brings scoop-and-soar fun to a whole new level, and is the perfect complement to any bathtub fleet. Helps practice development areas like motor skills, narrative play, and prosocial behaviors. Made in the USA from 100% recycled plastic with no BPA, phthalates, or PVC. Packaged with recycled and recyclable materials.

Imaginative Play and Learning Fun

Using the handle on the back of the body, scoop in water through the front of the plane, then fly it high as water streams out from the back and bottom. With a wide wingspan yet lightweight design, this aircraft is great for little ones and big kids alike. When the mission is complete, flip down the door on the bottom to clean inside with a bottle brush, or put the whole vessel in the dishwasher.

Classic Toys with an Eco Twist

This is not your typical toy plane. Manufactured and assembled in the USA, it's made from 100% post consumer recycled plastic milk jugs (HDPE #2 plastic) that save energy and reduce greenhouse gas emissions. With no external coatings, paints, or dyes, this super-safe, durable toy is good for the earth and safe and fun for little ones.

At a Glance
