

Lasuney Triple Display USB Type C HUB with to 2 HDMI, Displayport, PD3.0, Ethernet, 3 USB Ports, SD/TF, Multiport Adapter Docking Station Dongle for MacBook Air Pro and More Review-2021

[Read Customer Reviews](#)

[NOTE] For Mac OS, the system itself does not support extended screen effect. LASUNEY 10 in 1 Hub achieving one extended display by the following steps needed from you: Setting-Display-Arrangement-Cancel Mirror Display. And please drag the setting box to the page of the external screen. Then you can get one display of HDMI1=HDMI2=DP, one display of your laptop. Totally two different contents for Mac OS.

[VIVID HD 4K OUTPUT & MULTIPLE DISPLAY] Mirror or extend your screen and directly stream HD 4K video to HDTV, monitors, or projectors for a cinema-like visual feast. Under Extended Mode, you can enjoy up to 4 multiple display if your source device support DP1.4 and has AMD graphic card. The final resolution is determined by your devices and connection, please check Product Guides and Documents or contact us for confirmation.

[RELIABLE AND SUPPER-SPEED DATA TRANSFER] Two USB 3.0 ports supporting transmission speed rates up to 5 Gbps and one USB2.0 compatible with more data devices. Built in SD and TF slots for easy access to files from universal SD and Micro SD Memory Card, support 2 cards reading simultaneously. 1000Mbps Ethernet port perfect standby for laptops without Ethernet sockets when wireless network fails.

[POWER DELIVERY] LASUNEY Multiport USB C adapter provides one Type-C PD port which you could securely charge your MacBook or other Type-C laptops. It supports 100W power in and power out (charging) limited to 87W for safety after connecting the original charger of your laptop to the type c port on the hub. Please note that the Type-C port is for Power Delivery only, but not data transfer and display.

[STYLISH DESIGN AND BOARD COMPATIBILITY] This Hub is made of thin and sleek precision milled aluminum enclosure, light enough to take anywhere. Space Gray is perfect complement for your devices. It is an ideal USB-C hub for most Type-C laptops, such as Macbook (including Air/Pro), and laptops from Dell, HP, Lenovo, etc. Final performance of the product is determined by the type-c port of your computer, please contact us to confirm compatibility through the Amazon Message. Please Note Before Your Purchase

On Mac devices:

Mac OS can't support the MST feature. Mac OS through HDMI and DP ports can only extend 2/3 monitors with the "same screen contents" but different with the laptop display content.

Compatibility:

Please check the list below. If your laptop not included in the list, please let us know, we are very gladly to help you check if the adapter can work with your device.

4K Resolution:

The final resolution of HDMI output depends on your host devices. Only when your devices support 4K resolution (AMD + DP1.4), the video output will be 4K. [DP1.4 + one external display >> 4K@60Hz. Other connections >> up to 4K@30Hz.] For details, please refer to "Product guides and documents" or send us message for confirmation.

About 4 Screens:

Only "DP1.4 and AMD processor computers" or "Apple models listed after 2018 with dual systems installed" can achieve 4 screens when using the WIN system.

Connection:

We do not recommend adding an "extra extension cable or port conversion adapter" for the hub as it can cause slow transmission, HDMI port not being recognized, or other connective problems. When using the hub, you will need to connect the original charger of the computer to ensure the normal use of product functions.

Incompatible USB Format:

Please confirm whether the format of your USB device is compatible. If it is incompatible, a formatting operation is required, and data must be backed up before operation.

COMPATIBILITY : (Not a full list)

We certainly need your help to complete the list, please send us message with your device model

Laptop with a fully function(support charging, data transfer and video output) USB-C port or Thunderbolt 3 port. Or please confirm with us.
