

Video Conference Lighting Kit - Jelly Comb Bicolor LED Light for Video Conference, Photography, Remote Working, Zoom Call, Self Broadcasting and Live Streaming Review-2021

[Read Customer Reviews](#)

Adjustable Brightness & Color Temperature: Control your lighting brightness from 1% - 100% to get the perfect lighting. Adjust from warm light to cool light to get your perfect environment.

Built-in Battery: The built-in battery provides long time lighting and you can plug the light into your USB port to provide external power.

Equipped with Suction Cup and Mini Tripod: Suction cup can be used on any flat surface. Mini tripod can be directly connected with the light panel to provide a ultra-low position lighting as you like.

Wide Application: With a standard hot shoe mount and 1/4" Female Screw, the light can be mounted on any DSLR camera, tripod, bracket, light stand, etc

Soft & Professional Light: The video conference lighting is equipped full color gamut, two-color temperature lamp beads - high quality, high lumen, and high definition lamp bead. The light is softer, uniform, with more realistic colors. Portable and Lightweight

The light is only 112g, which will not put any pressure on your computer and you can carry it easily.

Mini pocket size, compact and effective.

Soft and Brightness

There are 3 light modes (warm light, natural light and cold light). You can adjust from a warm light to a cool light range 3100K - 5500K. Perfect meet your need.

High Quality Mini Tripod

The tripod has Adjustable height and its head can Rotate 360° horizontally and 180° up and down to find your best & beautiful shooting angle.
