Product Description

The ViewSonic VX2457-mhd is a 24-inch (23.6-inch viewable) Full HD monitor built for gaming and entertainment. Equipped with VESA Adaptive-Sync Technology, this monitor's variable refresh rate capabilities virtually eliminate screen tearing and stuttering for fluid game play during fast-paced action scenes.

Key Features

Ultra-fast response time

AMD FreeSync Technology

Low Input Lag

Black Stabilization for Ultimate Visibility

Game Mode hotkey and user-customized settings

Ideal For: Gaming and Entertainment

Features

Ultra-Fast Response Time

With an ultra-fast 2ms response time, this monitor delivers smooth images without streaking, blurring or ghosting. For any and all fast-paced action sequences, you'll be glad your monitor reacts as quickly as you do.

AMD FreeSync Technology

Leveraging VESA Adaptive-Sync connectivity, this monitor is equipped with AMD FreeSync technology* that seamlessly synchronizes the frame rate output between your graphics card and monitor. This dynamic refresh rate effectively eliminates image tearing, stuttering, and jerkiness for smooth gameplay.

*AMD FreeSync technology with DisplayPort 1.2a connection port.

Low Input Lag

When the action on the battlefield gets intense, you need a monitor that can process every command from the keyboard, mouse, or controller as soon as they occur. With a built-in process reducer, this monitor does just that – decreasing the delay between all inputs, and allowing you to react in real time against any competitor.

Features

Black Stabilization for Ultimate Visibility

ViewSonic's Black Stabilization feature provides heightened visibility and detail by brightening dark scenes. Dominate the competition with enhanced visibility, even in the darkest scenes of a video game.

Game Mode Hotkey and User-customized Settings

A Game Mode hotkey opens pre-calibrated FPS 1, FPS 2, RTS, and MOBA settings that deliver the best blend of color and technology for specific gaming scenarios. In addition, three customizable 'Gamer' settings provide individual user preferences for specific games.
